IPM statement

It is the goal of Little Lake City School District to implement IPM by focusing on long-term prevention or suppression of pests through accurate pest identification, by frequent monitoring for pest presence, by applying appropriate action levels, and by making the habitat less conducive to pests using sanitation and mechanical and physical controls. Pesticides that are effective will be used in a manner that minimizes risks to people, property, and the environment, and only after other options have been shown ineffective.

Our pest management objectives are to: *(Example: Focus on long-term pest prevention)*

Focus on use of long-term pest prevention strategies. Maintain open lines of communication with all parties involved in our Integrated Pest Management actions.

IPM team

In addition to the IPM Coordinator, other individuals who are involved in purchasing, making IPM decisions, applying pesticides, and complying with the Healthy Schools Act requirements, include:

Name and/or Title	Role in IPM program
Brent Griffen - M&O Director	Manages M&O efforts: contract pest control service, prepares and distributes monthly reports, communicates w/CDC & Risk Management
M&O Custodial, Grounds, and Maintenance Staff	Day to day compliance including monitoring, inspection and communication with M&O Director

Pest management contracting

- Pest management services are contracted to a licensed pest control business.
Pest Control Business name(s): I.P.M. Tech Pest Management, Gopher Patrol
- Prior to entering into a contract, the school district has confirmed that the pest control business understands the training requirement and other requirements of the Healthy Schools Act.

Pest identification, monitoring and inspection

Pest Identification is done by: Maintenance & Operations Staff, I.P.M. Pest Management, and Gopher Patrol employees.
(Example: College/University staff, Pest Control Business, etc.)

Monitoring and inspecting for pests and conditions that lead to pest problems are done regularly by LLCSD Employees, M&O Staff, and Pest Control Companies and results are communicated to the IPM Coordinator.
(Example: District staff title, e.g. Maintenance staff)

Specific information about monitoring and inspecting for pests, such as locations, times, or techniques include:
(Example: Sticky monitoring boards are placed in the kitchen and are checked weekly by custodial staff.)

Incidents of pest observations are reported to the M&O Manager by Staff members and Pest Control Company. The M&O Manager determines appropriate IPM responses and communicates this information to his staff. A continuous cycle of Plan, Do, Check, and Act is followed with the ultimate goal of keeping the School District pest-free. A plan is formulated, executed, evaluated, and continued or modified. Incidents are discussed on an as-needed basis with the contract pest control service.

Pests and non-chemical management practices

This child care center has identified the following pests and routinely uses the following non-chemical practices to prevent pests from reaching the action level:

Pest	Remove food	Fix leaks	Seal cracks	Install barriers	Physical removal	Traps	Manage irrigation	Other
Ants	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Chemical pest management practices

If non-chemical methods are ineffective, the school district will consider pesticides only after careful monitoring indicates that they are needed according to pre-established action levels and will use pesticides that pose the least possible hazard and are effective in a manner that minimizes risks to people, property and the environment.

This child care center expects the following pesticides (pesticide products and active ingredients) to be applied during the year. (This list includes pesticides that will be applied by school district staff or licensed pest control businesses.):
